"SIGN TAX EARLY," SAYS MORSE

35 HATCHETITES HARD AT WORK TO DEFEAT VIRGINIA SATURDAY

Six of Last Year's Letter Men Back To Form Nucleus Of Team.

QUIGLEY IS AGAIN COACH

Captain "Dinty" Hughes May Have To Quit Team; New Men Showing Up Well.

BY ROBERT H. McNEIL.

Hard workouts and scrimmages are being indulged in daily by a squad of thirty-five Hatchetite gridmen preparing for a stiff schedule, which includes such aggregations as Georgetown, University of Virginia, Bethany, and Johns Hopkins. Saturday, September 30, the team gets its first action, when it meets the powerful Virginia eleven at Charlottesville.

Six of last year's letter men, Captain Hughes, Wells, Ptak, Connally, Altrup, and Manson have been working out with the squad and should form the nucleus of a fighting combination. However, it is doubtful whether Captain "Dinty" will be able to play in the games this year, as he will not be able to afford the time from his work. In his absence Al Connally, last year's tackle, will probably do duty at the pivotal position.

Many likely candidates have reported to Coach Bill Quigley, and out of this group should be found men to fill the shoes of the veterans of last season who failed to return. Chief among the new comers who will probably win berths on the Hatchetite eleven are Pryor, formerly backfield man from Mississippi A. and M. and University of Tennessee, Buckheiser, from University of Maryland, Johnson of West Point, Powell of University of Alabama, Calhoun, Thomas, former Eastern High star, Clements, Central High, Brown of last year's freshman team, Corbin, Everett, Fisher, Horany, Jacobson, Laux, Red Wallace, Strother, Held, and McPherson.

The squad went through its first scrimmage Saturday, September 23. From this workout and the one held Monday, it seems that the probable lineup which will face the aggressive Virginia team Saturday will be: Left end, Ptak; left tackle, Buckheiser; left guard, Clements; center, Connally; right guard, Jacobson; right tackle, Corbin or Strother; right end, Altrup; quarter back, Thomas; left half, Wells; right half, O'Keefe or Manson; full back, Pryor. Calhoun would have probably started at guard if he had not had his shoulder bone dislocated in practice Monday.

BOB McNEIL MANAGES G. W. FOOTBALL TEAM

Robert H. McNeil has been appointed acting manager of football to succeed Noble Johnson, who resigned and left the University because of ill health.

Johnson will enter the University of Illinois, near his home. He was elected to the Student Council from Columbian College last spring.

The acting manager is the sporting editor of the Hatchet. A manager of football will be regularly elected as soon as possible and the vacancy in the Student Council will be filled in the near future.

1922 GRID SCHEDULE

Sept. 30, University of Virginia, Charlottesville, Va.
Oct. 14, Johns Hopkins, Baltimore, Md.
Oct. 21, St. Johns College, Annapolis, Md.
Oct. 28, Bethany College, Wheeling, W. Va.
Nov. 4, Gallaudet, Kendall Green, Washington.
Nov. 11, Catholic University, Washington.
Nov. 18, Virginia Military Institute, Washington.
Nov. 30, Georgetown University, Washington.

STOKES WINS WORLD'S RIFLE CROWN AGAIN

G. W. U. Team Captain Defends Title Won in 1921 And Leads U. S. Team to Victory at Milan.

Courtesy Washington Daily News.

CAPTAIN W. R. STOKES
World's Best Rifleman.

Walter R. Stokes, captain of George Washington University's rifle team, won the individual rifle championship of the world for the second consecutive year in the international matches held at Milan, Italy, early this month.

With a score of 1,072 bull's eyes, he was high score man of the United States team, which scored 5,148 out of a possible 6,000 and won the team championship of the world.

THE STUDENT COUNCIL COMMITTEES NAMED

Nagle, Johnson, and Richmond Leave School and Council Posts.

Glenn Corbett, president of the Student Council, has announced the appointment of the various committees of student activities under the Council's jurisdiction, as follows:

Election—Melton (chairman), Wright, and Dyer.
Athletics—Tolson (chairman), Manson, and Colflesh.
Social—Wright (chairman), Burdick, and Lanigan.
Publications—Rahme (chairman), Nagle, and Norcross.
By-laws—Colflesh (chairman), Melton, and Rahme.
Charter—Nagle (chairman), Manson, and Bennett.
Finance—Lanigan (chairman), Tolson.
Honor—Bennett (chairman), Haynes.
Welfare—Dyer (chairman), Burdick.

Corbett said that early announcement of these committees is made so that the chairmen might start to work immediately upon the opening of the school year.

Due to the fact that Noble Johnson, Alford Richmond, and Ralph Nagle are not returning to school this year, there is a vacancy of one representative from Columbian College and two representatives from Engineering School on the Council.

LAW SCHOOL RECEPTION SET FOR OPENING NIGHT

President Hodgkins, Dean Ferson to Speak; Fraternity Prizes Will be Awarded.

The Law School Senate last week decided to hold the annual law school reception on the opening night of the school year. It will be held on the upper floor of the law school at 8 p. m. The president of the senate, Raymond Wisehart, and Vice President Wheeler will preside.

The program arranged by James Duggan, 1924, will include addresses by President Hodgkins of the University, Dean Ferson of the Law School, Joseph W. Cox, president of the Alumni Association, Edward Scheufler, representing the student body.

(Continued on page 4.)

PRESIDENT HODGKINS WELCOMES STUDENTS

Asks That Student Activity Spirit Enter Classroom.

To the students, new and old, I give greeting and welcome; greeting and welcome on behalf of the trustees and the faculties of the George Washington University.

The second year of the second century of the University's life opens with prospects brighter than at any previous time in its history. The last year was prosperous educationally, prosperous financially, prosperous in the spirit of loyalty of every member of the University. The success of that year has made it possible to provide additional facilities for the new year.

Notes Improvement of Buildings.

There have been improvements made in every building by the University. Especially important are the added in Arts and Sciences. The removal of the administrative to the Woodhull Building has made it possible to provide additional class rooms to give new quarters to the students. The architecture and to provide adequate rooms for the botany laboratory. The University is about to take possession of two buildings it owns on Twentieth Street. In one of these will be housed the courses in Domestic Science, and later the other building will be adapted for laboratory and office uses.

Important as are these housing improvements, of far greater importance is the increase in the facilities. In Arts and Sciences, in Law, in Medicine, there are new and additional men on the faculties—men of the highest training, and experienced in teaching. These additions to the teaching staff permit additional courses of study to be offered and provide additional sections in a number of subjects.

Advices Support of Activities.

The primary object of a University is education. Complete education is of the mind, of the spirit, of the body. We live among our fellow men. We must have the trained intellect to be able to associate on equal terms with the best. We need the spiritual honesty, the spiritual idealism, that will hold us to the good, and be an unlifting force to those around us. We must be trained to comradeship. For this the so-called student activities are of importance.

Athletics, publications, fraternities, debating societies, technical societies, clubs, and like organizations, are all of value. The faculties encourage and foster all such organizations; they advise and urge every student to take part in at least one of such activities, and to support the general student activities by subscribing to the activities fund. Such participation is a valuable part of training for the larger activities of life. But it is to be remembered that they are only a part, and not the most important part, of the University activities.

Hopes for Prosperous Year.

Is it expecting too much if I suggest that the student body so act this year that under the term student activities we may include in fullest measure the intellectual activities called for by the class and laboratory courses for which you are registered?

To all of you I wish a most prosperous year; a year so filled with good work that its end may find you more fully prepared in every way to take your part in life.

HOWARD L. HODGKINS, President.

Dean Rose Restrains Sororities From Bidding Before Feb. 1.

George Washington sororities will not pledge any girls until the second semester this year because of an order to this effect issued by Miss Anna Rose, newly appointed Dean of Women.

Miss Rose has instructed all of the girls' Greek letter societies not to pledge girls until the beginning of the second semester. Girls must have received an average of eighty-five per cent or above in their class work before they can be pledged.

This step is taken to improve the scholastic standing of these organizations and to promote closer relationship between the prospective pledges and the members, according to the Dean of Women.

Sororities Will Obey.

All of the sororities intend to carry out this order, the majority of them feeling that it will benefit them. "I think that Miss Rose's recent order will be a good thing for the sororities," said Miss Dorothy Sigman, expressing the opinion of Phi Mu. "It will work toward the higher class

standing of the sororities and will also make the girls better acquainted with each other. In this way stronger friendships will be maintained within Phi Mu."

Miss Maxine Girts, a member of Pi Beta Phi, also feels the decision of the Dean of Women a wise one, and is certain that all the girls of her sorority share her opinion on this subject.

May Ask Modification.

Chi Omega Sorority has voiced the belief that sorority girls should have as high scholastic standing as any of the girls at G. W.

Members of Sigma Kappa and other sororities have agreed to abide by the order.

Some Greek letter organization women are dissatisfied with the new rule and intimated that they will appeal for modification.

With the support of the Pan-Hellenic Association, the faculty is sure that this plan will meet with success and is fully confident that it will bring the sororities up to an even higher position than they now hold, and consequently work toward a better and finer George Washington University.

APPEALS FOR 2,000 SUPPORTERS TO AID G. W. U. ACTIVITIES

1922-23 Sports And Publications Program to Require \$20,000, Director Estimates.

PROSPECTS BRIGHTEST YET.

Immediate Subscription Remedy For Handicaps Team Faces Ex-Coach Points Out.

TAX SIGNERS RECEIVE

1. A share in George Washington University, its work, spirit, and activity government.
2. Admission to every athletic event in which a George Washington team participates.
3. The University Hatchet, a weekly G. W. U. newspaper, 30 issues each school year.
4. The Cherry Tree, G. W. U. annual.
5. Medical and hospital benefits, including home or office treatment, hospital room, board, medicine, and attention of nurse; physical examination of candidates for athletic teams; and emergency treatment at games.
6. Admission to all other approved activities.

(A tax card does not guarantee more than three visits to signers' homes during a single illness, nor more than two weeks free care in the University Hospital during a school term.)

Bryan Morse, director of Student Activities at George Washington University, today appeals to all students in the University to subscribe early to the voluntary student activities tax. Two thousand students must pledge themselves to pay the \$10 tax for student activities, which need \$20,000 this year if they are to be properly maintained; Director Morse declared.

Much Achieved in Past.

"George Washington students, through their subscriptions to the student activity tax, have made possible the football team, basketball teams for men and women, tennis teams—in all, twenty thriving activities during the past two years.

"There is every reason to feel encouraged at the start of this year in student activities. The Student Council has the best interests of the student body and the University at heart. Exceptionally fine managers and heads of organizations are cooperating for success. In all lines of activity there appears to be a big boom. Prospects were never brighter.

Will Combat Handicaps.

"But George Washington is without a football field, a gymnasium, or suitable rooms for the many activities. Despite these handicaps the University is maintaining first-class organizations, which, helped by student interest, spirit, and willingness, are making it a factor in this section of the country along the line of student endeavor.

"As director of Student Activities, I urge every student, man or woman, to maintain this success by subscribing to the student tax."

CLASS IN EDUCATIONAL AND INDUSTRIAL TESTS

William Carl Ruediger, Dean of Teachers College, announces a research course in Educational and Industrial Tests, will be offered by Dr. L. J. O'Rourke, at one time Psychological Specialist in the War Plans Division of the U. S. Army. The course will be known as Education 52, and offers six semester-hour credits. This course will meet for organization on Monday, October 2, at 7 p. m., in room 23, Lisner Hall.

CO-EDS TO LEARN D. S.

IN 20TH ST. BUILDING

The building on 728 Twentieth St. N. W., which has belonged to the University for some time, and which has heretofore been occupied by roomers, is to be remodeled for domestic science purposes, University officials announce. The location of this building is ideal because it is in the same square as the Administration Building.

WASHINGTON, D. C., September 29, 1922.

Keep G. W. U. First

Walter R. Stokes returns to our school as the world's best shot for the second consecutive time. We proudly remember that he is captain of a George Washington University rifle team, which has never been defeated. This thought may lead us to realize the wisdom of supporting this victorious aggregation in such a manner that it can keep George Washington ahead of all other universities in the field.

Last year this was not done. Our team won the collegiate championship of the United States in 1921. It raised our school to a height in intercollegiate competition seldom, if ever, reached in all George Washington history. And then, last year, this newly-crowned champion could not defend its title because it lacked facilities for training and funds for entering the matches.

The cost of maintaining a rifle team is small compared with amounts expended for other activities. No other G. W. U. team has won the collegiate championship of America.

May these facts inspire the Student Council, the director of Student Activities, and all others who control our activity treasury to exertion of every effort to appropriate enough so that World's Champion Walter Stokes and his undefeated team mates can bring the collegiate championship to George Washington University this year.

Signals!

Students and members of George Washington University, especially those who are entering the institution for the first time, The Hatchet, and every department of the school welcome you.

The University is glad to greet you—and ready. Never in the hundred and two years of its history has George Washington been prepared so well to accommodate those who joined its colors.

Newly opened Woodhull Building, reconstructed Lisner Hall, and improvements in all the University Buildings will promote administration of the University and facilitate education of its students. The College of Engineering again has a head who can devote his every energy to the success of that school and its students. Faculties of all the colleges have been strengthened.

This long-anticipated progress is a signal that our Alma Mater is advancing. Her students may profitably respond by proving themselves worthy of the gifts bestowed. The signal has been given. Are you ready to carry out your part of the play—or work?

Patronize Our Advertisers

Ye, individuals and organizations of the University, who realize in The University Hatchet an organ active in gathering the news of the school and boosting its interests, also see the confidence placed in it by the local firms and dealers who care to advertise in its columns. Their desire to advertise here arises from the belief that the readers of this paper have in the past and will continue in the future to patronize them. They help us by giving us their advertising, and it certainly behooves us to deal with those who are interested in us rather than with those who are not. Shall we not then, in a spirit of fair play, be willing to reciprocate with those business houses that show their good feeling toward the University and its newspaper by meeting us halfway?

This Year

By Betty Bradford.

Soliloquy of a G. W. co-ed returning to school after a summer in Washington and a course in "Up the River."

I'm really going to study this year. I'm not going out except on Saturday nights. Well, of course, I might go to some of the fraternity dances, but very seldom. We girls really have to go to them, though; it means so much for one's social prestige! But I won't go often. No; I'm going to study this year.

I wonder if the girls are going to wear long skirts to school. I hate to think of doing it. If a girl isn't bow-legged or knock-kneed, or deformed in some other horrible way, I should really think people would rather see her wear short dresses. I do wish someone would dare to be independent and keep her's up. But, then, long ones will make me look so slender. That's one consolation. I just know I'll look at least six feet tall, though. Oh, dear, and I suppose I'll have loads of dates with short men. I feel so foolish dancing with a short man. I bet I have a lot of short ones this winter. But, then, I'm not going out more than once or twice a week. I'm going to study this year.

I hate to try to pick courses out of the handbook, because you never can tell whether they're going to be hard or not. I don't believe in working too hard. It gets one in such a rut. And then, as Earl Fox said: "I love to see the young people have a good time!" It does one good to go out, I think. Of course, though, I'm going to study lots. That's really what I'm in school for. A good education is the most important thing a girl can have.

I wonder if I can let my green evening dress down in time for that dance Friday night. I know I won't look any taller than Frank. But I really must get some new ones down to my ankles like the other girls are wearing them. What's the use of living if you aren't in style! I've made up my mind that I'm going to get one good night's sleep a week this winter.

Indeed, I really am going to study this year!

GIRLS' REST ROOM NOW REFURNISHED

New Mirror, Chairs, Tables, and Cots Make Retreats More Useful.

An enormous new full-length mirror greets the eyes of the G. W. Co-Eds as they step into the women's rest room in Lisner Hall this year. It is a great improvement over the tiny one before which the hordes of girl students have been crowding for years.

New chairs and tables have also been selected and arranged in the room so as to make it not only more convenient for the girls, but more attractive and restful in appearance.

Improvements are planned for the Women's University Club rooms, at 2027 G Street. Cots probably will be placed in the rooms where the girls may relax in leisure moments. These rooms are open to all University girls who care to utilize them.

Dean Rose is to be credited with the securing of these changes beneficial to the women students.

RABBIT HOLE READY FOR ITS THIRD SEASON

11.30 A. M.-6.30 P. M. to be Hours When Tearoom Promises to Feed Famished Students.

The Rabbit will be at home from September 27 on, according to Katharine Tonge, who will manage The Rabbit Hole again this year.

The tearoom will be open from 11.30 a. m. until 6.30 p. m., except on Tuesdays and Thursdays, when 2 p. m. will be the closing hour. Luncheon will be served on Saturdays.

There will be a bulletin board for convenience, and an open grate fire is promised for the winter days.

WISCONSIN STADIUM GROWS.

Another section of 5,000 concrete seats is being added to the athletic fields of the University of Wisconsin. When this is completed the stadium will seat 27,000. This final goal is a 63,000-seat stadium.

OPENINGS ON HATCHET BUSINESS STAFF

All students interested in the business staff of the Hatchet, see the business manager between 4 and 5 p. m. any evening this week. This is an opportunity for those wishing to partake of the work on a newspaper and for those interested in the building up of a good Hatchet staff. The business staff will be chosen from those showing interest and ability in the various branches of the work.

HANDBOOK CANCELED AS FUNDS RUN SHORT

Some Sections of Guide to G. W. U. to be Printed in Hatchet.

Although arrangements had been made to publish the G. W. U. Handbook, as has been the custom from year to year, word was received at the last minute to abandon its publication, due to the lack of finances.

The handbook has been an institution in the University for a number of years and gives the usual information concerning the University calendar, the outline of the various student activities, fraternities, societies, and organizations, and other matters in concise form. The president of the Student Council appointed Edwin S. Bettelheim, Jr., managing editor, and Robert M. Bolton, associate editor of the publication.

Information usually contained in the G. W. U. Handbook will be given in the columns of the Hatchet.

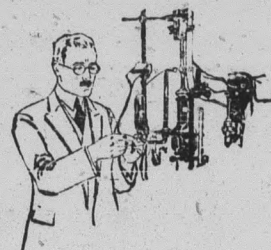

FARM WORK GAVE MISS IRISH COLLEGE DAYS

"How I Worked My Way Through College," by Miss Iona V. Irish, now teaching journalism in a Tulsa, Okla., high school, is one of the three successful articles in the \$500 prize contest published in the September number of The Delineator.

Miss Irish earned her college expenses as a farmerette during the summer and assisted in caring for children while attending the university. She climbed telephone poles with linemen's spurs to trim trees that interfered with telephone wires, and with a scythe cut down underbrush by the roadside. From a weak child she developed into one of the healthiest and best developed girls in the university before she graduated.

STUDENTS MAKE FURNACES.

Four types of electric furnaces were built by students in chemical engineering at the University of Wisconsin last year.

Which Type of Research is of Greatest Value?

A stove burns too much coal. A man familiar with the principles of combustion and heat radiation makes experiments which indicate desirable changes in design. That is research.

You want to make a ruby in a factory, a real ruby, indistinguishable by any test from the natural stone. You begin by analyzing rubies chemically and physically. Then you make rubies just as nature did. Your rubies are the result of research—another type of research.

While melting up your chemicals and experimenting with high temperatures, you begin to wonder how hot the earth must have been millions of years ago, and what were the forces at play that made this planet what it is. Your investigation leads you far from rubies and causes you to formulate theories to explain how the earth, how the whole solar system was created. That would be research of a still different type.

Research of all three types is conducted in the laboratories of the General Electric Company. But it is the third type—pioneering into the unknown—that means most in the long run, even though undertaken with no practical benefit in view.

For example, the Research Laboratories of the General Electric Company are exploring matter with X-rays in order to discover not only how the atoms in different substances are arranged but how the atoms themselves are built up. The more you know about a substance, the more you can do with it. This work may enable scientists to answer more definitely the question: Why is iron magnetic? Then the electrical industry will take a greater step forward than can be made in a century of experimenting with existing electrical apparatus.

You can add wings and stories to an old house. But to build a new house, you must begin with the foundation.

General Electric Company
General Office Schenectady, N. Y.

ELIZABETH KENDRICK W. U. C. PRESIDENT

Officers of the Women's University Club met recently to organize plans for the coming year. The administration for this term is led by Elizabeth Kendrick, president; Bernice Veeley, first vice president; Theresa Lawrence, second vice president; Anne Hof, secretary; and Phoebe Knatten, treasurer.

Membership to the club is open to all women students of the University, and application blanks may be obtained from Miss Anna Rose upon registration. Dues are set at 50 cents yearly.

The club will follow its practice of years and will continue to conduct student chapel once each week.

Exhibit of Men's Apparel

The purpose of this Style Show is to present to Washington college and business men the new and correct mode for day and night wear as interpreted by renowned authorities, and as most recently expressed at the International Style Show held at the Madison Square Garden in the City of New York.

During the entire week of Oct. 1st to 7th, Parker-Bridget will be devoted to an exposition of what is what in men's wear, and we will concentrate our efforts more to telling than selling, so that when you are ready to select for fall and winter you will have reviewed what the world's greatest markets (London and New York) have to offer to the men in the world's greatest capital.

University Quarters Improved During Vacation

NEW ADMINISTRATION BUILDING OPENS—LABORATORIES AND REMODELED CLASSROOMS SUPPLANT OFFICES IN LISNER HALL—BETTER LIGHTING SYSTEM INSTALLED IN 2022 G STREET.

BY ROBERT M. BOLTON.

Woodhull Building is the latest addition to the Department of Arts and Sciences buildings. Bequeathed to the University by the late General Maxwell Van Zandt Woodhull, formerly a member of the Board of Trustees and prominent in George Washington affairs, this structure has been converted into offices for the President and the various administrative officers.

During the summer months this new property was completely renovated and repaired. Modern office fixtures and furniture have been installed and the rooms and interior structure have been altered.

Formerly the different offices were located in separate buildings and a great deal of confusion and unnecessary work was unavoidable in order to keep them in communication. Offices in Same House.

The Treasurer's and Registrar's offices are on the first floor of the Woodhull Building. The Dean of Women also has an office on the same floor.

President Hodgkins' office is on the second floor. To the rear of his office is the office of Charles Holmes, treasurer of the University. On the other side of the hall are the offices of Elmer Louis Kayser, secretary of the

University and the president's secretary.

Greater G. W. U. Nearer.

Those rooms in Lisner Hall and 2101 G Street, heretofore used as offices, have been changed into laboratories and classrooms to relieve the congestion of last year, as better lighting system has been installed in 2022 G Street.

These additions and improvements are in keeping with the policy of the University to eventually buy up the ground in this section of the city and erect a greater George Washington University. University officials said.

GIRL ATHLETES PLAN YEAR OF TRIUMPHS FOR BUFF AND BLUE

Swimming Manager Bee Woodford, Alone, Wins Second Place For G. W. In Summer Meet

BASKETERS HAVE 8 GAMES

Tennis Tournament To Be Held This Month To Choose Varsity Team Members

BY BETTY WHITFIELD.

The University's girl athletes made rapid strides last year in every sport they entered. The swimming team, under the leadership of Beatrice Woodford, won high honors in the South Atlantic championship meet in Baltimore and the pentathlon in Philadelphia. It also made an excellent showing in various exhibitions and contests of its own.

The ball tossers, with Manager Daisy Robson, turned out in good form; morale was excellent, and a keen fighting spirit was displayed throughout the year. The tennis team put out tip-top work; Manager Markley centered attention on tournaments, and playing was unusually good. Louise Wheelchel won the silver loving cup in this sport, with Elizabeth Chickering as runner-up.

Bee Woodford Wins.

Beatrice Woodford, during the summer, won for the University a conspicuous place in the District Championship Swimming meets at the Tidal Basin. A series of weekly meets was held, in which were entered some of America's most famous swimmers; at the end, count taken of points made during the entire series gave George Washington second place. Miss Woodford, as the University's sole representative, captured first place in fancy diving, second place in high diving, and first place in the mile swim, finishing the latter 125 yards ahead of the next person.

While definite plans for swimming for the coming year have not been arranged, it is expected that Miss Woodford will again have charge of the team and that it will strive for still higher goals.

Letter Girls Back.

The girl basketballers, with Manager Margaret Brewer, will play about eight games this coming season, according to present indications. They will make but one trip, while the teams of at least three distant colleges are expected to visit here. Aside from these, the team will play Gallaudet and other local college teams. Several letter girls will be back on the team this year, making the forecast for this sport highly encouraging.

Tennis plans are being made by Manager Janet Elliot, who announces that the usual fall tournament will be held, the four winners to constitute next spring's team. A meeting of all interested will be announced at an early date.

RECEIVES NATIONAL CHARTER.

Gamma Phi Theta, local sorority, received word Friday that it had been granted a charter by Kappa Delta.

FACULTY INCREASED FOR 1922-23 TERM

Hugh Miller, Engineering College Dean; Other Changes in Arts And Medical Schools.

At the opening of school this year a number of changes and appointments have been made in the faculties. With these new members, the teaching staff has been made larger than at any other time in the history of the University.

Hugh Miller, C. E., has been appointed acting dean of the Engineering College. President H. L. Hodgkins, who is also Dean of Engineering, was compelled to make this change because of the quantity of work he has to accomplish as president of the University and dean of the Department of Arts and Sciences.

The new dean has been professor of Civil Engineering at this University since his resignation from the Engineer Corps, U. S. A., in September, 1921.

Princeton University Graduate.

He is a graduate of Princeton University, where he received his degree of Civil Engineer. He was formerly professor of civil engineering at both Clarkson College of Technology, Potsdam, N. Y., and Rice Institute, Texas.

Dean Miller obtained a commission in the army at the outbreak of the World War and was made an instructor in engineering at Camp Humphreys, Va. After the war he took the designing of various civic works, and was at one time connected with the Northern Power Co. of Potsdam, N. Y. He is a member of a number of engineering societies, among them being the American Society of Civil Engineers, the Society for the Promotion of Engineering Education, and the Washington Society of Engineers.

President Howard L. Hodgkins announces the following changes in the faculties of the various departments:

MEDICAL SCHOOL—Dr. Charles S. Butler, of the Naval Medical School, has been appointed professor of tropical medicine; Dr. Earl C. Follet, professor of physiology and pharmacology; Joseph H. Roe, promoted from assistant professor of chemistry to professor of chemistry; Dr. E. R. Northington, named professor of hygiene and associate professor of pharmacology.

DEPARTMENT OF ARTS AND SCIENCES—Hugh Miller, professor of civil engineering, has been made acting dean of the College of Engineering; Dr. John A. Donaldson has been made professor of commerce; James R. Sullivan, Macon University, named instructor in education, and Allan Deibert, of Harvard University, and Norman C. Giddings, instructors in romance languages; Dr. Warren Reed West, George Washington and Johns Hopkins Universities, instructor in political science, and Edwin Lee White, assistant in physics.

LAW SCHOOL—Prof. Alvin E. Evans, of Idaho, has been made a member of the George Washington University Law School faculty this year. Prof. Evans received his A. B. at Cotner University, Nebraska, in 1898. Later that same year he received his A. M. in the University of

Nebraska. His subsequent honors include: Ph. D., University of Michigan, 1908; J. D., in 1918. He attended Harvard Law School, 1915-1916, after which he became a member of the faculty of the University of Washington.

In 1917 he became a professor of law in the University of Idaho, from whence he comes to George Washington. Dr. Evans is also a member of the Michigan, Nebraska, and Idaho State Bars.

Student instructors and laboratory assistants will be announced within the next few days.

SAKS AND COMPANY

There is one thing a College man wants—quality of course; but with that distinctive style.

That's what you'll get in Saks Clothes—they are Saks made—so we know they are properly cut and properly made.

The prices are what they have always been—right.

EXPECT 8,000 TO REGISTER THIS YEAR

Enrollment of Freshmen Has Already Doubled Last Year's Record Figure, Office Says.

Registration at George Washington this year will far exceed the figures of any other year in the history of the school. Recent additions to the University's property were made to relieve the congested and overcrowded condition of the classrooms, but the large number of students who have entered will offset the increased accommodations.

Including the registration of the recent summer school the total number of students enrolled last year exceeded six thousand. It is very probable that this year will see nearly eight thousand.

War Influx Gone.

During the war and just following it, many of the students had come here to do work in connection with the war, and were consequently only at the school temporarily. The enrollment this year will be made up almost entirely of those who are permanent residents in this city or who came here to study at George Washington.

This increase has been noted in all departments of the University. The enrollment in the Law School freshman class is already double what it was last year. The freshman class of the Pharmacy School has increased far beyond its estimated size and new students are continuing to register daily. The freshman class of the Medical School reached its quota early in September and prospective students are still trying to enter the school.

Accurate figures are not yet attainable, as students are still registering, and so the registrar's office has been unable to get the total enrollments from the various departments. These figures will be published as soon as they are given out.

G. W. MEDICAL SOCIETY ELECTS DR. HALL CHIEF

Curtis Lee Hall, M. D., has been elected president of the George Washington Medical Society. Boyce Richardson Bolton, M. D., was elected secretary of the society at the same meeting.

Composed of the alumni of the Medical School, this society is credited with being one of the best organized associations of its kind in the university. It is planned to make the society even more active this year than it has been in the past.

The first meeting of the year will be held in the Medical School, October 21. The program has not yet been announced.

HATCHET TRY OUTS

All students of the University, particularly newcomers, who are interested in winning a position on the University Hatchet, should attend a meeting in the Hatchet Office, basement of 2022 G Street, Monday, at 8 p. m., when details regarding tryouts for the Hatchet staff will be given.

The Hatchet is always looking for the best material, and those coming to this meeting will be advised how they can display what talent they have, editors promise.

1923 CHERRY TREE STAFF BEGINS THE YEAR'S WORK

Hopes to Produce G. W. U. Annual in Early May.

Work has begun on the 1923 Cherry Tree, Robert H. McNeil, business manager of the yearbook, announces. During the summer months both editors, J. Joseph W. Palmer and McNeil, have consulted different printing, engraving, and photographic companies to secure the best grade of work for next year's annual.

It is expected that names of the members of the staff will be announced shortly by J. Joseph W. Palmer, editor. Then work will begin in earnest to turn out a book the University will be proud to consider as the best yet.

It is the ambition of both the business manager and the editor to have the yearbook ready for distribution during the early part of May. According to those in charge this can and will be done if the students will cooperate with the staff.

ELMER LOUIS KAYSER LETS SECRET ESCAPE

Mr. Elmer Kayser, secretary of the University and a member of Kappa Tau Omega Fraternity, announced, after a lapse of six months, that he had become an irate pirate of the sea of matrimony. His wife is Margery Ludlow.

The Kappa Tau Omega Fraternity held a pirate dance in honor of the newly-weds before their departure for Europe on their honeymoon, and Elmer gave word that he would survey the conditions there with a pending intention of settling in Germany where only an American dollar or two can put him in life de luxe.

Now, since the pirate has gone to the seas, the University is awaiting his return to resume his duties as secretary of the University. All are hoping that his usual independence will be evident after having been inveigled into eight months of conjugal felicity and under the dictatorship of a beautiful woman.

Mr. Kayser is a professor of history in the University.

DID YOU GET YOUR 13 HOT DOGS LAST YEAR?

Do you know what has replaced the well-known ice cream cone in the gastronomic taste of the collegiate world of Washington? None other than that lowly article which satisfies your whetted appetite when the day is frosty and you have possibly two hours more of class work before you may sit down to a square meal; none other than that delicious morsel which you step into a local hash house and order in two terse words: "Hot dog!"

One eating place in the vicinity of Columbian College sells approximately ten pounds of the brown doggies a day. Roughly speaking, the kiyis come about a dozen to a pound. In a week this means a sale of eight hundred and forty sizzling bow-wows—and for a school year about 26,050.

In the eight months of our school year this means thirteen warm, appetizing gloom-chasers for every student in Columbian College and over five for every student enrolled in the whole University. And that from merely one of our many eating places!

Can one think of a greater boon to students than that aromatic cylindrical object, protected like the pearl in an oyster from the outside world by the soft, white of a fresh roll, garnished and adorned with a dab of palate-enticing mustard, delicious to the taste, and allowing one to sit through his sociology lecture or biology lab with a satisfied feeling in the pit of his stomach?

The "daws" is, indeed, the friend of man!

ORGANIZATION DIRECTORY

All student organizations are requested to mail to the office of the University Hatchet the names and addresses of their officers to complete a directory of student organizations, being compiled by The Hatchet.

DAY CLASSES GROW AT SUMMER SCHOOL

More Popular Than Evening Courses During Past Vacation Term, Dean Ruediger Reports.

Thirty per cent more students attended day classes of the George Washington Summer School than evening classes. William Carl Ruediger, director of the summer school, reports. As a large number of the students who enrolled for the late classes are employed, the change in the working hours of the Government employees is held to be a big factor in the increase.

The fact that the summer school here at George Washington is becoming widely known and popular is evidenced by the number of men and women who came from all parts of this country to study at George Washington during the summer.

Director Ruediger thinks that next year the summer school will be even more successful than it was this year.

ANNA ROSE APPOINTED DEAN OF G. W. WOMEN

Miss Anna Rose, registrar for several years, has been made Dean of Women of the University. She retains her position as registrar, and is assisted by Miss Linda J. Kincannon, associate registrar.

The creation of the position of Dean of Women as a new office in George Washington University is a step forward in the administration of the University's affairs, because there never has been a person to draw the women together. The need of such a person has become more and more indispensable.

Miss Rose promises to work diligently to sponsor a spirit of cooperation and association among the girls of George Washington. She plans to meet with the girls one or two times each month.

Her office is in Woodhull Building.

LAW SCHOOL RECEPTION

Continued from page 1.)
and Prof. Evans, the new member of the law school faculty.

Tickets for upper classmen will cost 35 cents each; but there will be no charge to the incoming freshmen. After the program an informal reception will be held in the library. Refreshments will be served. The winner of the Ordonaux prize will be announced, as also will be winners of the Phi Delta Phi, Phi Alpha Delta, Phi Delta Delta, and other prizes.

Committee chairmen are Raymond Wisheart, advertising; Donald Little, tickets and finance; Margaret Conlyn and Clara Vain, refreshments; and James Duggan, program and speakers.
